

SERVICE STATION FOR AIRCRAFT ACCUMULATOR BATTERIES
SOKA 11, SOKA 111**APPLICATION**

- » automated service of basic accumulator batteries 20NKBN25 and 20KSX25P,
- » semi-automated service of acidic accumulator batteries 12SAM28 used in air force.

ADVANTAGES

- » automated service of accumulator batteries,
- » limiting operator's services to a necessary minimum,
- » reliability of service and objective assessment of battery condition:
 - » sequence and type of operations as well as parameters are programmed and operator has no influence,
 - » procedure of services comply with the service manual of the battery ,
 - » procedure of services is recorded in nonvolatile memory and can be printed as a report,
- » simultaneous service of:
 - » 3 batteries (SOKA 11),
 - » 1 battery (SOKA 111).
- » co-operation with external operator.

AWARDS

In 1997 Wojskowe Zakłady Uzbrojenia S.A. was granted the **DEFENDER** Award at the International Salon of Defence Industry for the development and production of SOKA 11.
